CustomLASIK

...quality of vision is the difference.

We are proud to offer our patients CustomLASIK, a truly customized approach to laser vision correction using the most advanced technology available in Laser Vision Correction.

The CustomLASIK technology takes hundreds of measurements of your eye's optical system allowing your surgeon to individualize your treatment. CustomLASIK offers the potential for clearer and sharper vision than you could ever achieve with glasses or contacts! CustomLASIK increases your chances of having 20/20 vision or better and virtually eliminates your chances of halos, glare and night driving difficulty.

And, be sure to ask about the IntraLase technology, which uses a laser to create the corneal flap required for surgery.
